

My family is a regular listener and financial support of KLove radio programming, received through FM translator 98.7FM here in Medford. We also listen to Air1 on 91.1. Both stations provide us with Christian music and programming that we cannot receive otherwise. I recently heard of a 'localism' campaign that could give LPFM stations priority over FM translator services and leave us with a very weak, or no signal, to receive KLOVE programming. KLOVE provides a positive message and music that communicates hope and love - a message that so many youth and adults need to hear. I hate to think of what alternative music and programming my middle-school daughter would listen to if KLove were not available and it worries me. Today's secular music is full of negatives, of distrust in society, of hopelessness and suicidal messages, of love without commitment, of disrespect, and of self-centeredness. I don't want us and our area to lose the positive messages we hear 7x24 on KLove and am petitioning the FCC to not allow the LPFM stations to take priority over FM translators like KLOVE. Thank you.
